A SECOND LIFE FOR PLASTIC BOTTLES

IMPACT

PET PLASTIC BOTTLES

The first step is to collect and wash the PET bottles

BOTTLE SCRAPS

Stripped of their labels and caps, they are crushed to pieces

FROM PET TO FABRIC

The collection of tomorrow.

It takes about 33 PET bottles to make a backpack

PRODUCTION

Final product is made and a second AWARE™ scan and verification is made

FABRIC

Fabric is made from the yarn with tracer

YARNS

Spin yarn from the genuine recycled feedstock embedded with AWARE™ tracer and verified with certification

AWARE
THE TRUE STORY OF RECYCLED FABRICS

AWARE™ tracer particles are added to the recycled fibre (unique fingerprint)

GAMECHANGER: RECYCLED COTTON

By making products with recycled cotton, we use fewer environmental resources than those needed to grow cotton.

Our recycled cotton is embedded with AWARE™ tracer particles to ensure it is recycled cotton fibre.

**FREE-LABOUR
COTTON**

Switch to Slave Free Cotton. Pick brands that don't use slave-picked cotton.

IMPACT

**20.000
LITER**

According to WWF, it takes more than 20.000 liters (5,283 gallons) of water to produce just one kilogram (2.2 pounds) of cotton, which roughly equals one T-shirt and a pair of jeans.
